

As the influenza season continues, Roanoke County Public Schools will take necessary steps to prevent the transmission of the H1N1 virus. When students present to the school nurse or designated office staff with a fever of 100 degrees or higher and other flu-like symptoms, a mask will be placed on his/her face while they wait to be picked up to go home. Please talk to your child about this so if they become ill at school and a mask is applied, they will not be frightened. Hopefully, they will understand that mask application is a good thing to do to prevent the spread of germs. Thank you for your assistance and cooperation with this..
